Charlotte Ringdal

is an applied development economist dedicated to enhancing the well-being of women and children through the study of public policies and interventions. Her research focuses on women's empowerment, parental investments in children, and addressing issues such as intimate partner violence and violence against children. She employs a variety of methods and collaborates with NGOs to develop and implement impactful programs.

Viola Asri

is an applied development economist examining how public policy and interventions can improve the well-being of vulnerable groups. Her research has focused on social assistance programs and supporting women's skill formation using a variety of methods and building on partnerships with government and non-government organizations.

The Development Learning Lab (DLL)

is a research and learning centre based in Bergen, Norway. Our goal is to enhance learning and improve the results of development programs. Our contribution is to make research-based knowledge more accessible, fill knowledge gaps about what works and why, and provide a systematic approach to learning from research and experience – within and across organisations. See more at www.devlearnlab.no.
